

Chester Asset Management Pty Ltd: Controls Report

Report on the internal controls over asset management
and related information technology services as at
30 June 2025

Report issued: 24 September 2025

To clients and other users of this Controls Report,

Report on internal controls at 30 June 2025 (GS007 Report)

Chester Asset Management Pty Ltd (**Chester**) provides investment management services to its clients contracted under investment management agreements.

This GS007 Report is provided to assist its clients to understand the design of Chester's control environment for the year ended 30 June 2025.

Chester's control environment partially relies on the effectiveness of its clients' operating frameworks. It is therefore important for clients to review section 3.4 Client control considerations within this Controls Report.

It is management's view that the control environment within Chester was effective during the period covered by this GS007 Report for the year ended 30 June 2025. Further detail on the specific exceptions (if any) are disclosed in Section 7 together with a management response.

Market conditions in Australia and globally remain volatile and uncertain. While the initial disruptions of the COVID-19 pandemic are now more than five years past and no longer a primary driver of instability, economic and geopolitical developments continue to weigh on investor confidence and financial system stability. During the reporting period, key contributing factors have included persistent inflation, elevated interest rates, and tighter monetary policy settings from central banks; ongoing geopolitical tensions — including the war in Ukraine, conflict in the Middle East, and rising tensions in the Asia-Pacific region; and political developments in the United States, where the Trump administration's use of, and threats to escalate, tariffs have added to global trade uncertainty. Sector-specific challenges, including vulnerabilities in parts of the global banking system, have further contributed to volatility. In Australia, rising cost-of-living pressures and higher energy and resource costs have amplified domestic economic uncertainty.

Management has considered the implications of these conditions on Chester's control environment and notes that, as at the reporting date, there has been no material impact on the design and operating effectiveness of the controls described in this report. The Independent Auditor's Assurance Report provided by Ernst & Young (**EY**) on the description of controls, their design and operating effectiveness over Asset Management and Information Technology services, was an unqualified opinion. EY's opinion is included in Section 1, Independent Assurance Report, within this GS007 Report for the year ended 30 June 2025.

Should you have any questions with respect to our GS007 Report please do not hesitate to contact me on (03) 9691 5437.

Yours faithfully

Robert Tucker

1. Independent assurance report

To the Management of Chester Asset Management Ltd ("Chester")

Independent Service Auditor's Assurance Report on the Description of Controls over Investment Management Services, their Design and Operating Effectiveness

Scope

We have been engaged to report on Chester's description at pages 15 to 30 of its asset management system/controls provided to Chester's user organisations throughout the period 1 July 2024 to 30 June 2025 (the Description), and on the design and operations of those controls related to the control objectives stated in the Description.

The Description indicates that certain control objectives specified in the Description can be achieved only if complementary user entity controls contemplated in the design of Chester's controls are suitably designed and operating effectively, along with related controls at the service organization. We have not evaluated the suitability of the design or operating effectiveness of such complementary user entity controls.

Chester uses an external IT provider, being Vorg Developments Pty Ltd and several applications for securities pricing and trading, being Bloomberg, IRESS and Artega Dimension, collectively referred to as "Subservice organisations". The description includes only those control objectives and related controls at Chester and does not include control objectives and related controls at the Subservice organisations. Our audit did not extend to the Subservice organisations. The description also indicates that certain control objectives specified by Chester can be achieved only if complementary Subservice organisation controls assumed in the design of Chester's controls are suitably designed and operating effectively, along with the related controls at Chester. Our examination did not extend to such complementary controls of Subservice organisations, and we have not evaluated the suitability of the design and operating effectiveness of such complementary Subservice organisation controls.

Service Organisation's Responsibilities

Chester is responsible for:

- a. preparing the Description and accompanying assertion at pages 4 to 5, including the completeness, accuracy and method of presentation of the Description and assertion;
- b. providing the services covered by the Description;
- c. stating the control objectives, including relevant controls objectives for services as outlined in AUASB Guidance Statement GS 007 *Audit Implications of the Use of Service Organisations for Investment Management Services*, and designing, implementing and effectively operating controls to achieve the stated control objectives.

Our Independence and Quality Management

We have complied with the independence and relevant ethical requirements, which are founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies Auditing Standard ASQM 1 *Quality Management for Firms that Perform Audits or Reviews of Financial Reports and Other Financial Information, or Other Assurance or Related Services Engagements*, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Service Auditor's Responsibilities

Our responsibility is to express an opinion on Chester's Description and on the design and operating effectiveness of controls related to the control objectives stated in that Description, based on our procedures.

We conducted our engagement in accordance with Standard on Assurance Engagements ASAE 3402 *Assurance Reports on Controls at a Service Organisation* and with reference to Guidance Statement GS 007 *Audit Implications of the Use of Service Organisations for Investment Management Services*. ASAE 3402 requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, the Description is fairly presented and the controls are suitably designed and operating effectively.

An assurance engagement to report on the description, design and operating effectiveness of controls at a service organisation involves performing procedures to obtain evidence about the disclosures in the service organisation's description of its system, and the design and operating effectiveness of controls. The procedures selected depend on our judgement, including the assessment of the risks that the description is not fairly presented, and that controls are not suitably designed or operating effectively. Our procedures included testing the operating effectiveness of those controls that we consider necessary to provide reasonable assurance that the control objectives stated in the description were achieved.

An assurance engagement of this type also includes evaluating the overall presentation of the description, the suitability of the objectives stated therein, and the suitability of the criteria specified by the service organisation and described at pages 15 to 30.

In evaluating the suitability of the objectives stated in the description, we have determined whether each of the minimum control objectives provided in GS 007 for services is included, or, if any of the minimum objectives are omitted or amended, that the reason for the omission or amendment is adequately disclosed in the description.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Limitations of Controls at a Service Organisation

Chester's Description is prepared to meet the common needs of a broad range of user organisations and their independent auditors and may not, therefore, include every aspect of the system that each individual user organisation may consider important in its own particular environment. Also, because of their nature, controls at a service organisation may not prevent or detect all errors or omissions in processing or reporting transactions. Also, the projection of any evaluation of effectiveness to future periods is subject to the risk that controls at a service organisation may become inadequate or fail.

Opinion

Our opinion has been formed on the basis of the matters outlined in this report. The criteria we used in forming our opinion are those described at pages 15 to 30. In our opinion, in all material respects:

- a. the Description fairly presents the asset management system as designed and implemented throughout the period from 1 July 2024 to 30 June 2025;
- b. the controls related to the control objectives stated in the Description were suitably designed to provide reasonable assurance that the control objectives would be achieved if the controls operated effectively throughout the period from 1 July 2024 to 30 June 2025; and user entities applied the complementary user entity controls contemplated in the design of Chester's controls throughout the period from 1 July 2024 to 30 June 2025; and
- c. the controls operated effectively to provide reasonable assurance that the control objectives stated in the Description were achieved throughout the period from 1 July 2024 to 30 June 2025 if complementary

**Shape the future
with confidence**

subservice organisations and user entity controls contemplated in the design of Chester's controls operated effectively throughout the period from 1 July 2024 to 30 June 2025.

Description of Tests of Controls

The specific controls tested and the nature, timing and results of those tests are listed on pages 15 to 30.

Use of Report

This report and the description of tests of controls on pages 15 to 30 are intended only for user organisations who have used Chester's asset management system, and their independent auditors, who have a sufficient understanding to consider it, along with other information including information about controls operated by user organisations themselves, when assessing the risks of material misstatements of user organisations' financial reports/statements.

The assurance report is prepared for this purpose only. We disclaim any responsibility for any reliance on our report to any person other than to your user organisations and their independent auditors, or for any purpose other than for which it was prepared.

Our report may also be distributed to ASIC and APRA (if they request the report), prospective user organisations of Chester, and any additional recipient approved in writing by Ernst & Young provided it is accompanied by the Controls Report used by Chester and our applicable engagement agreement, to enable user organisations and their independent auditors to verify that an assurance report has been commissioned by Chester and issued in connection with the controls of Chester, and without assuming any responsibility or liability to user organisations or their independent auditors on our part.

Management of Chester is responsible for ensuring that our assurance report is not distributed to any party (other than the parties mentioned above), including being made available on an internet website, without first obtaining our permission, which shall not be unreasonably withheld. The definitive version of our report is one bearing our original manuscript signature and Management is responsible for any errors or inaccuracies appearing in any reproduction in any form or medium.

2. Management's assertions report

Report by Management on System description and controls over asset management and related information technology services

The accompanying description has been prepared for clients who have used Chester's asset management system (**system**) and their auditors who have a sufficient understanding to consider the system description, along with other information including information about controls operated by clients themselves, when assessing the risks of material misstatements of clients'¹ financial statements. This description excludes the control objectives and related controls of subservice organisations.

Chester confirms that in relation to its investment management business:

- a. The accompanying description at pages 6-30 fairly presents the system for processing clients' transactions as at 30 June 2025. The criteria used in making this assertion were that the accompanying description:
 - i. Presents in all material respects how the system was designed and implemented, including:
 - The types of services provided, including, as appropriate, classes of transactions processed.
 - The procedures, within both information technology and manual systems, by which those transactions were initiated, recorded, processed, corrected as necessary, and transferred to the reports prepared for clients.
 - The related accounting records, supporting information and specific accounts that were used to initiate, record, process and report transactions; this includes the correction of incorrect information and how information was transferred to the reports prepared for clients.
 - How the system captures and addresses significant events and conditions, other than transactions.
 - The process used to prepare reports or other information for clients.
 - Specified control objectives and controls designed to achieve those objectives, including the control objectives for asset management provided in *Guidance Statement 007 Audit Implications of the Use of Service Organisations for Investment Management Services* except for three control objectives which have been amended or omitted for the reasons set out in the attached Description of Controls in Operation.
 - Controls that we assumed, in the design of the system, would be implemented by clients, and which, if necessary to achieve control objectives stated in the accompanying description, are identified in the description along with the specific control objectives that cannot be achieved by us alone. Please refer to Client Control Considerations in section 3.4.
 - Other aspects of our control environment, risk assessment process, information and communication systems (including the related business processes), control activities and monitoring controls that are relevant to processing and reporting clients' transactions.
 - ii. Does not omit or distort material information relevant to the scope of the system being described, while acknowledging that the description was prepared to meet the common

¹ For the purposes of this report, 'client' should be read to also include any party authorised to act on behalf of the client under the terms in the Investment Management Agreement (**IMA**) signed with each client (e.g., market participant, asset consultant, custodian, etc.).

needs of a broad range of clients and their auditors and may not, therefore, include every aspect of the system that each individual client may consider important in its own particular environment.

- b. The description includes relevant details of any material changes to the System during the period covered by the descriptions.
- c. The controls related to the control objectives stated in the accompanying description were suitably designed and operated effectively in all material respects throughout the period 1 July 2024 to 30 June 2025. The criteria used in making this assertion were that:
 - i. The risks that threatened achievement of the control objectives stated in the description were identified;
 - ii. The identified controls would, if operated as described, provide reasonable assurance that those risks did not prevent the stated control objectives from being achieved; and
 - iii. The controls were consistently applied as designed, including whether manual controls were applied by individuals who have the appropriate competence and authority.

Signed on behalf of management

Robert Tucker

Managing Director and Portfolio Manager
Chester Asset Management Pty Ltd

24 September 2025

3. Overview of Chester

3.1 Applicability of report

This report has been prepared in accordance with the Australian Auditing Standard on *Assurance Engagements ASAE 3402 Assurance Reports on Controls at a Service Organisation* and with reference to guidelines contained in *Guidance Statement 007 Audit Implications for the Use of Service Organisations for Investment Management Services (GS 007)*. The report provides a description of Chester and the controls relating to the investment management services provided throughout the period 1 July 2024 to 30 June 2025. The report details how those controls operate and is prepared for user entities, their auditors and other persons authorised by Chester and EY.

The report includes the description of the asset management and related information technology systems, and internal controls in place at Chester. It does not include the systems or controls in place at subservice organisations other than Copia Service Company Pty Ltd. The report has been prepared to meet the common needs across clients and their auditors and may not include every aspect of the system that each individual client may consider important in its own environment.

The report in its entirety is specific to the design and operating effectiveness of controls for client portfolios for which Chester has been appointed Investment Manager under an Investment Management Agreement (**IMA**). All controls are affected by inherent limitations and whilst controls are designed to operate effectively and may provide Chester and its clients with reasonable assurance in meeting the control objectives, errors or irregularities may occur.

3.2 Investment management services provided by Chester

Chester is an authorised representative (AR No.001254467) of Copia Investment Partners Ltd (Australian Financial Services Licence No 229316) (**CIPL**) which authorises it to conduct a financial services business in Australia. Chester has entered into a service agreement with CIPL, who provides Chester with administration services including: information technology services, accounting and client reporting.

Chester comprises an Australian focussed, high conviction, equities investment management team who offer portfolio management and fund allocation services focussed on Australian equities with some international equities. This report is specific to the individual mandated account services Chester provides to clients. These services involve maintaining investment portfolios in Australian equities in accordance with the terms of the IMAs agreed with its clients.

The stated internal control objectives and related controls included in this report apply to the operations of Chester and the associated asset management and information technology services. This includes relevant processes and controls undertaken within both Chester and CIPL.

3.3 Control environment supporting the provision of asset management services

Chester's governance, risk & compliance frameworks and management including the internal controls environment, are overseen by the CIPL's Board of Directors. Policies, procedures and guidelines to support the monitoring of these activities are commented upon or detailed below.

Compliance management framework

Compliance management of Chester is overseen by CIPL as the Australian Financial Services Licence (**AFS Licence**) holder responsible for the conduct of Chester's financial services activities.

The compliance management framework has been developed to systematically identify obligations imposed or agreed to by Chester and to implement mitigation strategies in a planned and coordinated fashion to reduce either the likelihood or consequence of obligation breaches or risks eventuating. Obligations include statutory, common law, regulatory and contractual obligations.

The compliance management framework consists of a Compliance Management Plan & Framework, the compliance & risk function, organisational staff performance management system and independent board oversight.

CIPL has adopted a “Three Lines of Defence” model in designing the compliance management process which is applied to Chester. An overview of the compliance management model is described below:

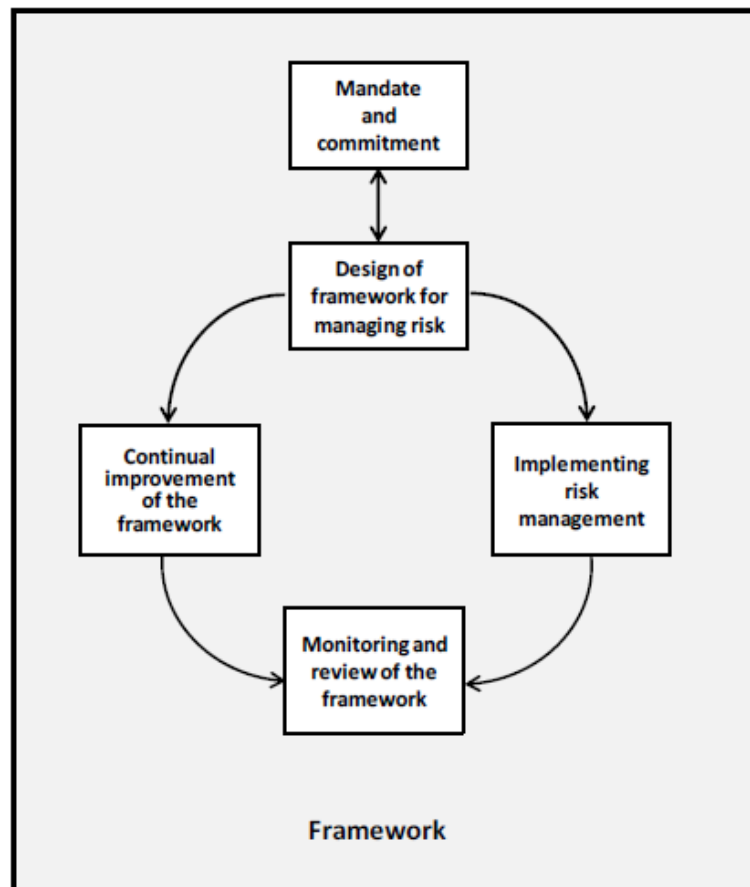

1 st Line		2 nd Line	3 rd Line
Management Controls (policies, procedures & processes)	Internal Control Measures (internal controls assurance system)	Financial controls	Compliance reviews
		Security (cyber & other)	CRS Certus (risk and compliance management system)
		Risk Management	
		Compliance Management	Independent reviews (as required)
		Quality Control	

The compliance management framework complements the Risk Management Framework implemented by CIPL and encompasses Chester.

Risk management framework

The Risk Management framework (**RMF**) has been developed to identify Chester's risks and to implement mitigation strategies to reduce either the likelihood of risks eventuating or the consequences.

The RMF consists of all documents (including a Risk Management Strategy) and activities implemented by Chester to manage risk as well as independent board oversight. The RMF has been developed with reference to the *ISO310000 Risk Management*. An overview of the RMF is described below:

Board

The responsibilities of the CIPL Board of Directors, with respect to the Governance, Risk and Compliance frameworks, include monitoring:

- a) Chester's compliance with its regulatory responsibilities in the provision of its financial products and services;
- b) the operation of the governance, compliance and risk management frameworks and making any recommendations for improvements; and
- c) the controls environment.

Business Control self-assessments

Chester's compliance and risk management framework is maintained through internal controls testing. Responsible persons complete regular controls self-assessments by means of regularly completing questionnaires regarding internal controls that they are responsible for. The frequency of questionnaires varies depending on the materiality of the risk addressed by the controls and the level of support provided by other independent controls covering the same obligation.

Responses to the questionnaires are considered and if required investigated by the Legal Risk & Compliance Manager and material matters arising from the responses are reported to the CIPL Board.

Monitoring and Oversight of the Governance, Risk & Compliance management Framework

In addition to maintaining an internal risk and compliance function, Chester also engages the services of Compliance & Risk Services Pty Ltd (**CRS**). CRS is an external, independent, specialist in compliance and risk management services and it provides objective support to the Governance, Risk & Compliance Framework. CRS has direct access to the Chester Board.

People and culture

Chester employees must adhere to CIPL's workplace conduct policies which address personal conduct, honesty, performance management, conflict of interest and disclosure as well as compliance and risk requirements.

Chester monitors and ensures adequate human resourcing to ensure delivery of services and products. Chester's employees are provided training in accordance with CIPL's Training Policy.

Anti-Money Laundering and Counter-Terrorism Financing (AML/CTF)

CIPL as the AFS Licensee has adopted an AML/CTF Program which covers the provision of designated services and programs for Chester's products and services. These include:

- employee screening prior to appointment
- collection and verification of customer identities
- ongoing customer due diligence and
- monitoring of customer transactions, including identification and as necessary reporting of suspicious matters.

Appointment and monitoring of third-party providers

The management of material outsourced arrangements is supported by CIPL's Outsourcing Policy which covers the process of appointing and monitoring subservice organisations to support Chester's financial services business.

CIPL uses Vorg Developments Pty Ltd (**Vorg**) to provide information technology services. Vorg provides IT management consultant services which support the asset management service system used by Chester. The information technology services provided by Vorg include the management and maintenance of Chester's and CIPL's IT infrastructure. CIPL's IT system includes CIPL's monitoring the effectiveness of the controls at Vorg and the relevant control objectives and related controls of Vorg.

Chester uses Bloomberg, IRESS and Artega Dimension information systems for security pricing and trading. These software systems are provided by vendors and Chester's asset management system excludes the relevant control objectives and related controls of those vendors.

3.4 Client control considerations

Chester expects that each client will have in place its own control environment with an established and effective governance structure supported by control systems, processes and authorities. Chester's ability to meet control objectives detailed in this report may rely on controls for which the client is responsible. Controls for which the client is responsible may include but are not limited to:

Information

- Timely provision of complete and correct information as defined in the IMAs, such as modification of the portfolio or processing requirements, or authorised persons.
- Appropriate authorisation and allocation procedures relating to mandates allocated to Chester, including cash flow instructions.

Monitoring

- Timely review of investment reports provided by Chester to the client.
- Monitoring and review of services provided by any third party appointed by the client.
- Review or audit of client's own compliance and operational effectiveness.

Technology

- Maintenance, security and integrity of the client's systems, information and communications.

4. Safeguarding Assets

Chester does not take custody of client assets. Each client is required to appoint a custodian for the safekeeping of their assets managed by Chester under an IMA.

5. Description of asset management controls

5.1 Client on-boarding

Chester has implemented an on-boarding process for clients upon acceptance of appointment as investment manager under an IMA. Client accounts are configured according to the terms of each IMA. This includes implementing client specific trade rules in two trading and portfolio control spreadsheets maintained separately by both the front and mid offices and the Artega Dimension system.

5.2 Client information and documents

C IPL's Privacy Policy governs the recording, release and retention of information in relation to Chester's clients. All client information and documents are stored in a secure environment, accessible only to authorised staff members.

Chester's document management is also regulated by C IPL's Record Keeping Policy.

5.3 Trade execution and processing

Chester maintains established pre-trade and post-trade compliance monitoring functions within its internal information technology systems. All executed purchase and sale transactions are monitored for compliance with the investment guidelines set out in the IMA. Non-compliance issues are reported to and resolved by management or escalated and managed via C IPL's incident and breach reporting process.

5.4 Reporting

Chester provides investment performance reports and portfolio valuation reports to mandate clients to allow monitoring of service levels. Client reports are provided regularly depending on the specific requirements of the relevant IMA.

Oversight reporting is implemented to ensure the executives of both C IPL and Chester participate in the compliance and risk management process. The incidents register is reviewed by the compliance function regularly and material matters are reported to the C IPL Board by the Legal Risk & Compliance Manager. All identified incidents are monitored by the Legal Risk & Compliance Manager in accordance with C IPL's Incident and Breach Handling Policy to ensure rectification steps are completed and preventative measures implemented in a timely fashion.

Chester does not provide tax reporting to clients. Tax reporting is usually performed by the custodians appointed by clients.

5.5 Reconciliations

Transactions for each fund are entered in IRESS and then electronically sent to the client's custodian daily for settlement. Trades are also loaded into the Artega Dimension portfolio record system electronically from CHESS and positions and cash balances are reconciled against the custodian's records and separately maintained trading and portfolio control spreadsheets, IRESS records and Bloomberg records, thereby providing multiple intraday and daily reconciliations. Additionally, full cash & holding reconciliations are performed monthly.

The portfolio administrator performing reconciliations is segregated from the investment management team and both the front and back offices conduct their own reconciliations.

5.6 Pricing

Securities pricing is achieved through live updates sourced from Artega Dimension via the custodians as a source of truth record. These are compared against independent data sources from IRESS and Bloomberg. Final pricing is determined by the custodian appointed by the client.

5.7 Fees

Clients calculate fees payable to Chester. The Managing Director and Portfolio Manager reviews all client invoices to ensure they agree with the fees calculated by clients, before they are presented to the custodians for payment.

6. Description of information technology controls systems

6.1 Key IT Systems

The key IT systems for Chester's business are:

- Artega Dimension – a portfolio record system implemented by the outsourced investment administrator Artega Investment administration (**Artega**). This system records trades directly from CHESS, performs daily post trade compliance checks and communicates with the clients' custodians' systems.
- IRESS IOS – IRESS is an application used for placing trades with brokers after modelling pre trade compliance.
- Bloomberg – a data provider used for independent securities pricing and for holding portfolio records which are reconciled daily against portfolio records maintained by the front desk in MS-Excel and the daily custodian holdings and transactions reports.
- Microsoft Excel which is used by the mid office to record daily transactions before posting into IRESS IOS and a separate MS-Excel spreadsheet to record portfolio positions. This spreadsheet is reconciled daily against the spreadsheet maintained by the front office as an additional control.

6.2 Physical and logical access

CIPL has implemented access control procedures for employees, visitors and contractors including restricting access to sensitive areas to only those personnel whose duties require access to such areas. All secured sensitive and critical areas have electronic controls which allow for logging and review of access histories in addition to controlling and restricting authorised access. Access is reviewed periodically, and inappropriate access is revoked as job roles change or employment is terminated.

User accounts and other access privileges for CIPL and Chester employees and representatives are created, modified or revoked only after appropriate requests are made via the approved system access request process. CIPL and Chester employees and representatives are assigned and required to use unique user accounts and passwords to access both application and network resources.

Procedures allow for modification of user access in the event of job role or employment changes and for emergency revocation when circumstances require, such as in the case of involuntary terminations.

6.3 Change management

In accordance with CIPL's change management process, changes must be documented, reviewed, approved and monitored. Changes cannot be approved for installation without proper documentation and test results.

6.4 Incident management

CIPL maintains a register of incidents and breaches for Chester. Incidents/breaches are monitored by the Legal Risk & Compliance Manager in accordance with CIPL's Incident & Breach Handling Policy and reported to the CIPL Board on a regular basis. Risk consequences are additionally considered as part of the biannual risk register review process, involving management and Board inputs with changes to the register effected as required.

6.5 Business continuity and disaster recovery

CIPL has developed a Business Continuity Management framework to mitigate disruptions to Chester's business operations and ensure the impact of any interruption is minimised. CIPL's Business Continuity Plan includes a Pandemic response plan to address events such as the COVID-19 pandemic.

CIPL also has a Disaster Recovery Plan that sets out the procedures and processes to be followed by Chester in case of a failure of the IT infrastructure including the office server, email server, investment management portfolio and dealing systems, and telecommunications systems.

At least annually, CIPL conducts a series of business continuity planning activities that include fire drills and half yearly recovery tests of virtual servers and last saved backup information onto a separate server. Testing results are evaluated, improvement opportunities identified, and recommendations reported to key stakeholders.

As part of its risk management framework and processes, CIPL conducts regular (biannual) vulnerability assessments on its website and related websites including that established for Chester. A tag-and-test exercise was successfully completed during the year and will be repeated on a regular basis.

6.6 Maintaining and developing systems hardware and software.

CIPL's board is responsible for setting the IT systems budget, which includes addressing the requirements of Chester. The CIPL Chief Financial & Operating Officer approves all hardware and software purchases on recommendation of the IT consultant. The IT consultant is responsible for implementing and maintaining the hardware and software assets.

7. Management's description of controls and EY's tests of operating effectiveness

The controls, which were in operation at CIPL and Chester throughout the period 1 July 2024 to 30 June 2025, or during a lesser period where specified, over asset management and related information technology services are described in the tables:

- Section B – Asset management (pages 17- 23)
- Section G – Information Technology (pages 24 – 30)

EY, the service auditor of CIPL and Chester, has determined the nature, timing and extent of audit procedures to be performed to obtain evidence about the effectiveness of Chester controls in meeting the control objectives during the period 1 July 2024 to 30 June 2025. The procedures performed by EY to test the operating effectiveness of these controls are listed next to each of Chester's respective control objectives and control procedures. EY's results from their audit are listed next to the description of audit procedures performed.

Internal controls, no matter how well designed and operated, can provide only reasonable, not absolute, assurance to management, CIPL's Board of Directors, Chester and clients regarding achievement of an entity's objectives. The likelihood of achievement is affected by the limitations inherent in all internal control systems. These include:

- the reality that human error may occur and judgment in decision making can be faulty;
- persons responsible for establishing controls need to consider their relative costs and benefits; and
- controls can be circumvented by collusion of two or more people or unforeseen events or changes in circumstances.

The following abbreviations are used throughout this report

Abbreviation	Full title
CFOO	Chief Financial and Operating Officer
ETC	Electronic Trade Confirmation
HOO	Head of Operations
IMA	Investment Management Agreement

IT Consultant	Vorg Developments Pty Ltd
PM	Chester Asset Management – Portfolio Manager
SLA	Service Level Agreement

B Asset management

Ref	Controls specified by Chester to meet the control objective	Procedures performed by EY to test the operating effectiveness of controls as described	Results of procedures
Accepting clients			
<i>B.1</i>	<i>New accounts are set up completely and accurately in accordance with Client agreements and/or offer documents and any applicable regulations.</i>		
B1.1	New Client IMAs are completed by Chester and are subject to legal or compliance review.	Management confirmed that there were no new IMA's during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.
B1.2	All authorised signatories are approved by the board of Chester and the authorised signatories list is reviewed annually.	Obtained the Chester Asset Management authorised signatories listing and inspected that it was reviewed and approved by the MD/PM in January 2025.	No exceptions noted.
B1.3	Pre-trade and post trade compliance rules are reviewed, in accordance with the IMA, by the MD/PM and a PM prior to any trade activity commencing and are incorporate into Artega Dimension.	Management confirmed that there were no new IMA's during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.
B1.4	Trading activity cannot commence until access to Custodian account and records are affected and confirmed via a Standard Settlement Instruction.	Management confirmed that there were no new IMA's during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.
B1.5	Fees are calculated by the clients according to the formulas in the IMAs. Invoices are provided by the clients to their custodian to pay the fees. The MD/PM review the invoices and payments to confirm they agree with the amounts they have calculated according to the formulas in the IMAs. Any discrepancies are addressed back to the clients.	Management confirmed that there were no new IMA's during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.

Ref	Controls specified by Chester to meet the control objective	Procedures performed by EY to test the operating effectiveness of controls as described	Results of procedures
B2.2	Client agreements are executed by the director(s) of Chester.	Management confirmed that there were no new IMA's during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.
B2.3	Client agreements are subject to review to confirm that required documentation is in place prior to activity commencing on the account.	Management confirmed that there were no new IMA's during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.
Authorising and processing transactions			
B.3	<i>Asset investment transactions are properly authorised, executed and allocated in a timely and accurate manner.</i>		
B3.1	Trades and weights against targets and any breaches of the compliance rules are tracked and reported in Artega Dimension as well as copies of separately maintained portfolio records maintained in front and mid office spreadsheets, IRESS IOS and Bloomberg. Compliance reports are generated daily out of Artega Dimension which are reviewed by the MD/PM and CIPL Head of Operations (HOO) and others daily. Breaches are investigated and rectified in accordance with the IMA and the Breach/Incidents reporting process.	Obtained a sample of 25 Artega Dimension system compliance reports and inspected for review by the MD and HOO and confirmed that any breaches were reviewed and rectified in accordance with the IMA.	No exceptions noted.

Ref	Controls specified by Chester to meet the control objective	Procedures performed by EY to test the operating effectiveness of controls as described	Results of procedures
B3.2	All proposed trades are confirmed in writing by the MD/PM reviewing a screen shot of each trade loaded into the IRESS IOS circulated in MS-Teams. Trades are tested for compliance by modelling in the Artega Dimension system. A screen shot is taken of each placed trade, which is then recorded into a daily trade spreadsheet. This is then loaded into a copy of the portfolio records maintained by the mid-office. Trades are advised to Artega Dimension and clients' custodians. CHES confirms settlements to both Artega Dimension and the custodians. All traded positions are reconciled against monthly reports (holdings, transactions and cash) provided by the custodians and Artega Dimension against spreadsheets maintained by Chester, IRESS IOS and a Bloomberg maintained portfolio.	For a sample of 25 trades, inspected evidence of confirmation of the trade by the MD/PM, with this trade then recorded in the daily trade spreadsheet. Inspected that the sampled trades were contained within the daily holdings and transactions reports provided by the Custodian. For a sample of 25 dates, inspected that compliance reporting was conducted by the Chester investment team.	No exceptions noted.
B3.3	Delegated authority for authorised officers to trade with Brokers is approved by the MD/PM.	Obtained the Chester Asset Management authorised signatories listing and inspected that it was reviewed and approved by the MD/PM in January 2025.	No exceptions noted.
B.4	<i>Transactions are undertaken only with approved brokers</i>		
B4.1	The due diligence process as set out in the Brokerage Arrangement Procedure is applied to new brokers by the Management of the relevant Fund prior to the appointment of an authorised broker. The due diligence selection criteria are applied and signed off by the MD/PM or a PM and reviewed as required.	Obtained a sample of two due diligence checklists for new brokers and inspected that they had been reviewed by the MD/PM in line with the Brokerage Arrangement Procedure.	No exceptions noted.
B4.2	New brokerage agreements are settled and signed by the MD/PM. New appointments are entered into the Broker List maintained by Chester.	For a sample of two new brokers, obtained the brokerage agreement and inspected for review by the MD/PM. Obtained the subsequent broker list and inspected the new brokers were included.	No exceptions noted.

Ref	Controls specified by Chester to meet the control objective	Procedures performed by EY to test the operating effectiveness of controls as described	Results of procedures
B4.3	Broker performance is monitored by Chester and any performance issues are managed and resolved by the mid office and, if required, by the portfolio managers. Any Incidents/breaches are entered into the Incidents and Breaches Register, managed and resolved, and reported to CIPL at scheduled Board meetings.	Inspected that the brokerage criteria spreadsheet is monitored and reviewed by the Chester investment team. Inspected that incidents and breaches were reported to CIPL at Board meetings.	No exceptions noted.
B.5	<i>Asset investment and related cash transactions are completely and accurately recorded and settled in a timely manner.</i>		
B5.1	Refer to control B.3.2.	Refer to control procedure B3.2	No exceptions noted.
B5.2	Cash positions are maintained within the Dimension portfolio management system, which is updated daily via automated feeds from the custodian (BNP). On a monthly basis, a cash reconciliation is prepared for review, with reconciling items investigated and resolved in a timely manner. This process ensures that recorded cash balances align with custody records and that cash activity is complete and accurate.	Obtained a sample of two-month end holdings reconciliations and inspected that any reconciling items were investigated and resolved by the Chester investment team.	No exceptions noted.
B5.3	The Dimension portfolio management system is updated daily with holding and transaction data received directly from the custodian (BNP), providing a complete shadow record of client portfolios. In addition, a full holdings file is provided to the custodian on a monthly basis for reconciliation, with any differences investigated and resolved in a timely manner.	Obtained a sample of two holdings reconciliations and inspected that any differences in the reconciliation were investigated and resolved.	No exceptions noted.
B.6	<i>Corporate events are identified and generated, respectively, and then actioned, processed and recorded accurately and in a timely manner.</i>		
B6.1	Refer to controls B3.2 & B5.2	Refer to control procedures B3.2 and B5.2.	No exceptions noted.
B6.2	Voting information processed in the web-based proxy voting services and is independently checked for accuracy to ensure voting is carried out in accordance with Chester's voting policy.	Refer to control objective B19.	No exceptions noted.
B.7	<i>Client new monies and withdrawals are processed and recorded completely and accurately, on a timely basis, and withdrawals are authorised.</i>		

Ref	Controls specified by Chester to meet the control objective	Procedures performed by EY to test the operating effectiveness of controls as described	Results of procedures
B7.1	Chester monitors cash levels to ensure a cash buffer is maintained in accordance with the IMA requirements. Daily compliance reports are reviewed by the MD/PM, the mid office and HOA and any potential and actual breaches are investigated and rectified in accordance with the IMA.	Refer to control procedure B3.1	No exceptions noted.
B7.2	New monies and withdrawals require formal instruction from an authorised client representative and in accordance with the time frames as stipulated in the IMA.	Management confirmed there were no new monies or withdrawals therefore EY were unable to obtain evidence for this control.	No exceptions noted.
Maintaining financial and other records			
<i>B.8</i>	<i>Accounts are administered in accordance with Client agreements and/or offer documents.</i>		
B8.1	Client reports are prepared by CIPL as required by the IMAs using data compiled from Artega, the clients' custodians and Chester. These are reviewed by the HOO) prior to sending to clients.	Obtained a sample of two quarters client reports and inspected that they had been sent to the client and had been reviewed by the HOO.	No exceptions noted.
B8.2	A register of incidents and breaches is maintained with breaches reported to Compliance and relevant management. All incidents and breaches are reported to the board of CIPL.	Obtained the Incidents and Breach Register and inspected for review by the CFOO and Compliance. Obtained Board Minutes for five Board meetings and inspected that incidents were included as an agenda item.	No exceptions noted.
<i>B.9</i>	<i>Changes to non-monetary Client data (for example, address changes and changes in allocation instructions) are authorised and correctly recorded on a timely basis.</i>		
B9.1	All requested changes to client data are checked for accuracy and against an authorised signatory list. Changes are implemented within 10 business days of notification.	Management confirmed that there were no changes made to client data during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.
B9.2	All changes to client data entered into the registry system by Artega are subject to review by the MD/PM.	Management confirmed that there were no changes made to client data during the period, therefore EY were unable to obtain evidence for this control.	No exceptions noted.
<i>B.10</i>	<i>Investment income and related tax are accurately recorded in the proper period.</i>		

Ref	Controls specified by Chester to meet the control objective	Procedures performed by EY to test the operating effectiveness of controls as described	Results of procedures
B10.1	The IMA clients and their custodians hold the accounts of record for the mandates and undertake all tax related activities. Both Artega and the Chester team reconcile transactions records against holding statements provided by the Custodian(s).	Refer to control procedures within objective B5.	No exceptions noted.
B.11	Investments are valued using current prices obtained from independent external pricing sources or an alternative basis in accordance with Client agreements.		
B11.1	For the purposes of traded securities, the spreadsheets used by the investment team have real time automated pricing feeds from IRESS and Bloomberg on all open positions.	Reviewed that the spreadsheets used by the investment team had real time automated pricing feeds from IRESS and/or Bloomberg on all open positions.	No exceptions noted.
B11.2	A portfolio valuation report is completed by Artega and sent to clients or clients' custodians in accordance with the requirements of the relevant IMA. Portfolio Valuation Reports are completed by the CIPL Operations team and reviewed by the HOO prior to distribution to clients.	Inspected a sample of two months portfolio valuation reports and noted they had been sent to the client in accordance with the IMA and had been reviewed by the HOO.	No exceptions noted.
B.12	Cash and securities positions are completely and accurately recorded and reconciled to third party data.		
B12.1	Refer to B5	Refer to control procedures in control objective B5.	No exceptions noted.
B.13	Investment management fees and other account expenses are accurately calculated and recorded in accordance with Client agreements and/or offer documents.		
B13.1	Where management fees are calculated by the client, invoices are reviewed by the MD/PM to the client's calculations.	Inspected review by the MD/PM of two quarter's invoices prior to being sent to the client.	No exceptions noted.
B13.2	Trade related fees such as brokerage fees are calculated in IRESS IOS according to the pre-determined brokerage rate recorded as static data for each broker.	Refer to control procedure B3.1 and B5.2.	No exceptions noted.
Safeguarding assets			
B.14	Investments are properly registered and Client money is segregated.		
	Not applicable as Chester does not safeguard client money and assets.		
B.15	Appropriate segregation exists between the service organisation's asset management and custody services, which may give rise to a conflict of interest.		
	Not applicable as Chester does not safeguard client money and assets.		
Monitoring compliance			

Ref	Controls specified by Chester to meet the control objective	Procedures performed by EY to test the operating effectiveness of controls as described	Results of procedures
<i>B.16</i>	<i>Client portfolios are managed in accordance with investment objectives, monitored for compliance with investment guidelines and restrictions and performance is measured.</i>		
B16.1	Refer to controls B1.3 and B3.1	Refer to control procedures B1.3 and B3.1.	No exceptions noted.
<i>B.17</i>	<i>Transaction errors are rectified promptly in accordance with the service level agreement and/or offer document or Client instructions.</i>		
B17.1	Incidents & Breach Register is reviewed by the CIPL CFOO and Compliance and is provided to the board of CIPL at each scheduled meeting.	Refer to control procedure B8.2.	No exceptions noted.
<i>B18</i>	<i>Counterparty exposures are monitored in accordance with Client agreements and/or offer document.</i>		
B18.1	Investment guidelines are monitored in accordance with client agreements and/or offer documents.	Refer to control procedures B1.3 and B3.1.	No exceptions noted.
B18.2	Refer to B1.3.	Refer to control procedure B1.3.	No exceptions noted.
Monitoring subservice organisations			
<i>B19</i>	<i>Appointments of subservice organisations, including those providing asset management services, are approved, subservice organisations are properly managed and their activities are adequately monitored</i>		
B19.1	All sub-service organisations are appointed in accordance with CIPL's Outsourcing Policy and are approved by the board of Chester or its delegate.	There were no new sub-service organisations appointed during the year hence this control was not required to operate during the year.	No exceptions noted.
B19.2	The performance of CIPL is monitored by the Chester team daily. CIPL has, in part, sub delegated investment administration to Artega.	Refer to control procedures B3.2 and B5.3.	No exceptions noted.
Reporting to clients			
<i>B.20</i>	<i>Client reporting in respect of portfolio transactions and holdings (including collateral) is complete and accurate and provided within required timescale as detailed in the IMA.</i>		
B20.1	All client reporting is prepared by CIPL in accordance with the IMA. All reports are prepared by the CIPL Investment Operations Administrator and approved by the HOO prior to distribution to clients.	For a sample of two client reports, obtained evidence they were prepared, approved and provided to the client in accordance with the IMA.	No exceptions noted.

G Information technology

Ref	Controls specified by Chester Investment Partners Ltd to meet the control objective	Procedures performed by Ernst & Young to verify the existence of controls as described	Results of procedures
Restricting access to systems and data			
G.1	<i>Physical access to computer networks, equipment, storage media and program documentation is restricted to authorised individuals</i>		
G1.1	Physical access to the Server room is restricted by swipe card access/key which is limited in distribution to individuals approved by the CIPL CFOO.	Observed a user accessing the server room to determine that the physical access to the server room is restricted by swipe card access. Inspected the list of users with access to server room to determine that the access was restricted to authorised users approved by the CFOO.	No exceptions noted.
G1.2	A system generated log of employee access to the server room is reviewed regularly by the CIPL IT Consultant/Office Manager and annually by the CIPL CFOO. Any incidents/breaches are entered into the Register, managed and resolved, and reported to the board of CIPL at scheduled meetings.	Inspected the access log to the server room to determine that this has been reviewed by the CFOO. Inspected a sample of one quarterly Board meeting minutes and two quarterly SLA monitoring reports for the IT Contractor for review by the CFOO to determine that IT incidents were monitored for timely resolution.	No exceptions noted.
G.2	<i>Logical access to computer systems, programs, master data, client data, transaction data and parameters, including access by administrators to applications, databases, systems and networks, is restricted to authorised individuals via information security tools and techniques.</i>		
G2.1	Firewalls are in place to prevent unauthorised access and malicious attacks. These are developed, maintained and monitored by the CIPL IT Consultant, reporting to the CIPL CFOO.	Inspected CIPL's network configuration to determine that firewall's software configuration was enabled to prevent unauthorised access and malicious attacks.	No exceptions noted.
G2.2	Access to Chester's network and system in-scope (application, database and operating systems) are protected by a range of mandatory and recommended password configuration settings and parameters as defined in CIPL's Cyber Security Policy.	Inspected the password configuration settings at the application, database, operating systems and network layers to determine that they were configured in accordance with CIPL's Security Policy.	No exceptions noted.

G Information technology

Ref	Controls specified by Chester Investment Partners Ltd to meet the control objective	Procedures performed by Ernst & Young to verify the existence of controls as described	Results of procedures
G2.3	Logical access to CIPL's network, database, operating system, active directory and applications is restricted to appropriate personnel and provided in line with the requestor's job role. Access is only granted by the CIPL IT Consultant upon written approval by CIPL CFOO.	Inspected a sample of five new Chester user request for in-scope systems to determine that: 1. Access to the in-scope system was requested in the access request form 2. Access request was reviewed and approved by CFOO before access was provisioned in the system 3. Access granted to users in the system was based on the job roles and responsibilities. 4. Access was appropriately granted in the system according to access approved in the request.	No exceptions noted.
		Refer to procedure in G2.5 and G3.1.	Refer to results of procedures in G2.5 and G3.1.
G2.4	Remote access to CIPL network by Chester staff is controlled by VPN with network credentials. All staff receive VPN access upon provision of their access to Chester's network.	Inspected CIPL's VPN configuration settings to validate that remote access was secured to only allow access with valid network credentials.	No exceptions noted.
		Refer to G2.3 procedure 1 for the remote access approvals for the new users.	
G2.5	Access to CIPL network and applications are de-activated within 1 day of termination.	Inspected a sample of four (4) terminated employees to determine that access to CIPL's network and applications were removed within one day of termination.	No exceptions noted.
G2.6	The MD/PM approves in writing employees' access to Artega Dimension and IRESS systems.	Refer to Control Procedure G2.3.	No exceptions noted.
G.3	<i>Segregation of incompatible duties is defined, implemented and enforced by logical security controls in accordance with job roles.</i>		

G Information technology

Ref	Controls specified by Chester Investment Partners Ltd to meet the control objective	Procedures performed by Ernst & Young to verify the existence of controls as described	Results of procedures
G3.1	User administration access to the CIPL network is approved by CIPL CFOO and segregation of conflicting duties is achieved through role-based access within key business applications. Bi-annual reviews of roles and profiles in relation to application, database and operating systems is conducted by the CIPL CFOO.	Inspected a sample of bi-annual review of roles and profiles in application, operating systems and database to determine that: 1. User accounts and privileged accounts in application, operating systems and database were included in the review. 2. User system roles profiles considered segregation of duties and were reviewed and approved by the CFOO. 3. IT team performed follow up on the review result	No exceptions noted.
Authorising and processing transactions			
G.4	<i>IT processing is authorised and scheduled appropriately, and deviations are identified and resolved in a timely manner.</i>		
G4.1	Chester does not operate any IT systems that require the operation of scheduled routines or jobs.	Management confirmed that Chester does not operate any IT systems that require the operation of scheduled routines or jobs.	No exceptions noted.
Safeguarding assets			
G.5	<i>Appropriate measures, including firewalls and anti-virus software, are implemented to counter the threat from malicious electronic attack.</i>		
G5.1	Firewall maintained between servers and external environment to protect internal networks against unauthorised external access.	Inspected CIPL's network configuration to determine whether a firewall was maintained between servers and external environment.	No exceptions noted.
G5.2	Systems are protected from viruses and malicious attacks via the use of anti-virus software, which is updated automatically as new virus definitions are released.	Inspected the configuration settings of anti-virus software to determine that the configuration was set to push automatic updates to the systems connected to the network.	No exceptions noted.

G Information technology

Ref	Controls specified by Chester Investment Partners Ltd to meet the control objective	Procedures performed by Ernst & Young to verify the existence of controls as described	Results of procedures
G5.3	The firewall and anti-virus software is monitored by the CIPL IT Consultant for any intrusions or malicious attacks. Any incidents are investigated and resolved in a timely manner.	Inspected the firewall and antivirus threat report for the audit period to determine that alerts were raised and resolved. Refer to G10.1 for the investigation and resolution of incidents.	No exceptions noted.
G5.4	System and website protection controls are tested against external attacks via regular (biannual) penetration testing/vulnerability assessment.	Inspected the penetration testing report to determine whether penetration testing was performed during the audit period to test system protection controls against external attacks.	No exceptions noted.
G.6	<i>The physical IT equipment is maintained in a controlled environment.</i>		
G6.1	The CIPL Server room is established with uninterrupted power supply, air conditioning and temperature control as well as fire detection controls.	Observed the environmental controls within the server room to determine that uninterrupted power supply, air conditioning, temperature control and appropriate fire detection controls were in place.	No exceptions noted.
G6.2	Preventative maintenance tasks are scheduled and maintained by outsourced provider in accordance with Support Plan Agreement	Inspected a sample of one building maintenance report to determine that preventative maintenance tasks are performed by the outsourced provider in accordance with the Support Plan Agreement.	No exceptions noted.
Maintaining and developing systems hardware and software			
G.7	<i>Development and implementation of new systems, applications and software, and changes to existing systems, applications and software, are authorised, tested, approved, implemented and documented.</i>		
G7.1	Chester only uses vendor provided software systems.	Management confirmed that Chester only uses vendor provided software systems. Thus, G.7 control objective is not applicable.	No exceptions noted.

G Information technology

Ref	Controls specified by Chester Investment Partners Ltd to meet the control objective	Procedures performed by Ernst & Young to verify the existence of controls as described	Results of procedures
G.8	<i>Data migration or modification is authorised, tested and, once performed, reconciled back to the source data.</i>		
G8.1	Data migration or modification is authorised, tested and once performed, reconciled back to the source data.	Management confirmed that there has been no data migration activity during the audit period, therefore this control was not required to operate during the period.	No exceptions noted.
Recovering from processing interruptions			
G.9	<i>Data and systems are backed up regularly offsite and tested for recoverability on a periodic basis.</i>		
G9.1	Procedures for data backups, storage, and retention have been defined. Back-up monitoring is completed by the CIPL IT Contractor.	Inspected CIPL's backup policies and procedures to verify that all files are backed up daily to a Network Attached Storage (NAS) device and determine that a dual backup process is in place.	No exceptions noted.
		Inspected a sample of two (2) monthly data backups to determine that backup was performed by the IT Contractor.	
G9.2	The back-up and retention of systems and data are governed by CIPL's Business Continuity and Disaster Recovery Plan. A back-up restoration is performed bi-annually, and results of exercise are reviewed and signed off by CIPL CFOO.	Inspected the BCM and Disaster Recovery policy and procedures to confirm they have been documented and approved by the board. Inspected the back-up restoration testing results to confirm that it has been tested and reviewed by CFOO.	No exceptions noted.
G.10	<i>IT hardware and software issues are monitored and resolved in a timely manner.</i>		
G10.1	All hardware and software incidents are monitored and resolved by the CIPL IT Contractor in a timely manner. Any incidents/breaches are entered into the Register, managed and resolved, and reported to the board of CIPL at scheduled meetings.	Inspected a sample of two (2) quarterly Board meeting minutes and two quarterly SLA monitoring report for the IT Contractor reviewed by the CFOO to determine that IT incidents were monitored for timely resolution.	No exceptions noted.
G.11	<i>Business and information systems recovery plans are documented, approved, tested and maintained.</i>		

G Information technology

Ref	Controls specified by Chester Investment Partners Ltd to meet the control objective	Procedures performed by Ernst & Young to verify the existence of controls as described	Results of procedures
G11.1	Business and information technology systems' continuity plan and disaster recovery plan are documented and approved by the board of CIPL or its delegate.	Inspected the Business Continuity Plan and Disaster Recovery Plan to determine that they were documented and approved by the Board.	No exceptions noted.
G11.2	Business and information technology systems recovery plan and disaster recovery plans are tested (including backup restoration), maintained and updated on a bi-annual basis to ensure appropriate contingency procedures have been put in place in the event of a major disruption.	Inspected the recovery plans for the in-scope system to determine that they had been reviewed and updated by management on a bi-annual basis. Inspected a sample of periodic business and disaster recovery test plan report to determine that testing was completed.	No exceptions noted.
Monitoring compliance			
G.12	Information technology services provided to Clients are approved, managed and performance thresholds met in accordance with the requirements of the Client agreement.		
	Not applicable as Chester does not provide any information technology services to clients.		
Monitoring subservice Organisations			
G.13	Appointment of sub-service organisations, including those providing IT services, are approved, sub-service organisations are managed in accordance with the requirements of the Client agreement and their activities are adequately monitored.		
G13.1	All new vendor contracts and changes to existing contracts are reviewed against a checklist and subject to legal or compliance review. Final sign-off and approval is provided by the MD/PM.	Management confirmed that there were no new or changes to vendor contracts during the audit period, therefore this control was not required to operate during the period.	No exceptions noted.
G13.2	Service Level Agreements are in place for third party service providers. All critical outsourced activities are monitored by Chester to ensure appropriate service delivery in accordance with the agreed Service Level Agreements and outcomes are reported quarterly to the	Inspected the SLAs and contracts of the technology support service provider to determine that SLAs were agreed with the service provider, documented and reviewed on a quarterly basis.	No exceptions noted.

G Information technology

Ref	Controls specified by Chester Investment Partners Ltd to meet the control objective	Procedures performed by Ernst & Young to verify the existence of controls as described	Results of procedures
	board of CIPL. Service delivery levels are reviewed on a regular basis by the CIPL CFOO.	Inspected a sample of two (2) quarterly monitoring reports to determine that the services were delivered in accordance with the agreed SLAs and that the monitoring reports were reviewed by the CIPL CFOO.
