1. Purpose of Plan

This **Business Continuity Plan (BCP)** sets out the procedures for the staff of Copia Holding Company Pty Ltd), its controlled entities and authorised representatives appointed by Copia Investment Partners Ltd (**CIPL**) (collectively referred to as **Copia** or **Copia Group**) and sub-tenants whom rely on Copia's infrastructure to follow in the event of a disruption to the business' operations resulting, for example, from; a disaster, natural or human-caused events, accidents, crimes or system failures. This BCP also includes actions to be taken in the case of a pandemic occurrence.

This BCP provides the procedures and guidelines to be followed in the event of a disruption to the business' operations, with the aim of continuing normal operations as soon as possible after the event. The Plan is intended to ensure that:

- maximum possible service levels to our investors are always maintained
- we recover from any interruptions within a reasonable timeframe; and
- the impact of any interruption is minimised.

This **Disaster Recovery Plan (DRP)** sets out the procedures and processes to be followed in case of a failure the IT infrastructure, including the officer server, email server, investment management portfolio and dealing systems, and telecommunications systems.

Failure of the IT infrastructure is a subset of business interruptions. We have therefore incorporated our **DRP** within the **BCP**. The **BCP** and **DRP** are collectively referred to as this **Plan**.

2. Responsibilities, authority and action plan

This Plan proposes that such a disaster event be managed by a **Crisis Management Team (CMT)** consisting of the:

Chief Executive Officer	CEO
Chief Financial & Operating Officer	CFOO
Head of Operations	HOO

3. BCP/CMT Coordinator

The BCP/DRP Coordinator (**Coordinator**) is the CFOO. The alternate Coordinator is the HOO.

The CMT is to be led by the CFOO.

In relation to the **DRP**, the CFOO is assisted by the IT Consultant.

In the event of any disaster the CFOO may, depending on the circumstances take the following actions:

- evaluate the extent of the damage and assess the situation
- instigate a plan of action and provide directions towards recovery and, as may be required, assemble the CMT to assist with the following actions:
 - * notify staff of the situation and instruct whether to attend work
 - * co-ordinate initial contact with the CMT, board members (as required), major service providers, the administrators and the custodians, and the Australian Securities & Investments Commission (**ASIC**) (where appropriate)

- * restore a working environment. This will include mobilising and coordinating with the IT Consultant, and may include organising contractors and technicians to correct any failures
- * investigate the possible need of securing an adequately equipped emergency work site
- * seek to establish the continuation of 'business as usual'
- * brief the IT Consultant on requirements to conduct ongoing business operations; and
- * where appropriate, notify the Copia's insurers, including assessing the amount of any loss with insurers and initiate any required claim action.

4. BCP/DRP Objectives:

The objectives of this BCP are to:

- a) identify all **Critical Business Activities (CBAs)** and ensure they remain up-to-date and are maintained on a regular basis
- b) to the extent that a CBA is disrupted, implement recovery procedures (either directly or via its third-party service providers) that aim to:
 - (i) recover the CBA in a timely fashion
 - (ii) minimise the financial, legal, regulatory, reputational and other material consequences arising from the disruption
- c) ensure that all persons fulfil their allocated role, act within scope of authority, and exercise their responsibilities in a prudent manner; and

In the case of the DRP the objectives are to:

- a) Identify all critical IT infrastructure services and business critical information
- b) Establish recovery point objectives (**RPO**) for business-critical information. A RPO is the age of files that must be recovered from backup storage for normal operations to resume if a computer, system, or network goes down; and
- c) Document and implement procedures to ensure the RPOs may be met in case of a system outage or IT infrastructure failure.

The immediate protection of human life takes priority over any other action. This is usually managed by the emergency authorities if the buildings that the Copia Group operates its businesses from are imperilled.

5. Business Impact Analysis

5.1 Requirements

In order to plan for business continuity, it is necessary to conduct a regular business impact analysis to identify and document all Copia's CBAs. In considering the possible impact of disruption to our CBAs, we will consider:

- a) plausible disruption scenarios over varying periods of time
- b) the period of time for which Copia could not operate without each of its CBA
- c) the extent to which a disruption to the CBA might have a material impact on the interests, or legitimate expectations, of its investors; and

- d) the financial, legal, regulatory and reputational impact of a disruption to the Copia's CBAs over varying periods of time.

The following are the key risk scenarios which have been assessed by Copia as having a high impact on the group of companies, staff, authorised representatives and (potentially) our investors (albeit with a potentially low probability of occurrence), including:

- **Destruction or major damage to Copia's premises:** This scenario may arise from any number of events including fire, explosion, terrorist activity or Force Majeure or because of collateral damage from an incident at a near-by location.
- **Major disruption to data processing systems:** this may be caused by a disruption to the services at Copia or a major service provider (such as: a power supplier; a fund or investment administrator; or a custodian).
- **Major fraud or financial loss:** A range of circumstances could lead to a significant financial loss and may be fraud related or may be due to other factors.
- **Major loss or incapacity of staff resources:** major loss or incapacity of staff, e.g., due to staff illness caused by a pandemic.
- **Failure of a major supplier:** Major suppliers include the custodians, fund or investment administrators, unit registry, the power supplier, Microsoft cloud-based software and Telstra. Depending on the extent of reliance at the time of an incident, other suppliers may come within the definition of major supplier.

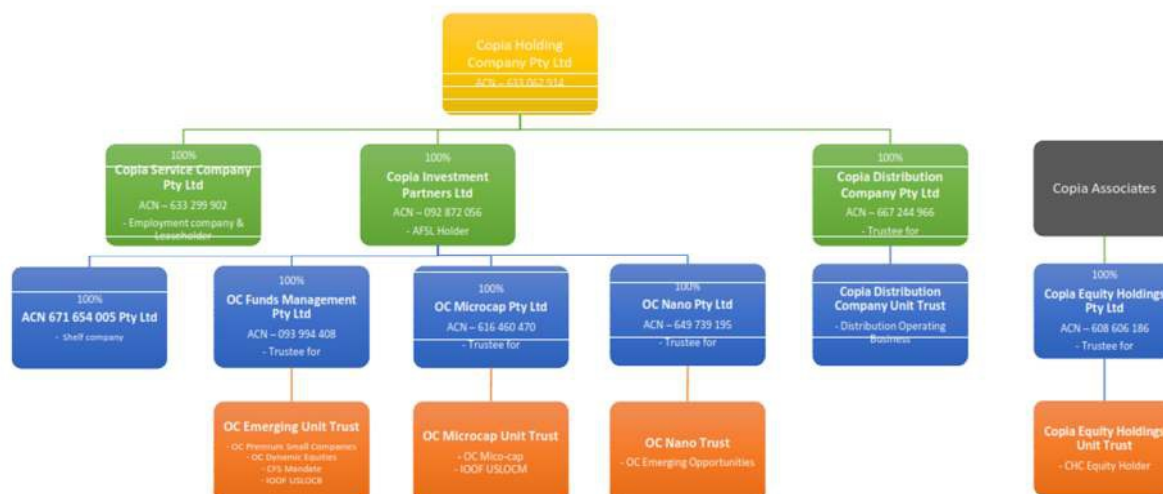

5.2 Business description

Copia comprises a holding company and three subsidiary companies. One of the subsidiaries, CIPL, has appointed corporate authorised representatives related to three investment teams. Two of these teams, the OC Funds and the Chester teams, are co-located in the Melbourne office and they rely on the infrastructure provided by Copia. The third investment team is not dependent on Copia's infrastructure.

Copia has distribution team members located in its offices in Sydney, Brisbane and Melbourne. This team is dependent on Copia's infrastructure.

Copia provides office and infrastructure services to sub-tenants located in its Melbourne office. These tenants require access to the Melbourne office and rely on Copia's infrastructure to varying degrees.

Copia provides office space to Artisan Partners in the Sydney office, however, this does not entail providing access to any Copia infrastructure.

Supporting the Copia group and its authorised representatives are enabling functions, such as human resources, IT, administration, accounting, compliance, sales, marketing and distribution. These enabling functions are centralised and provided by Copia Holding Company Pty Ltd, Copia Service Company Pty Ltd or CIPL.

The list of outsourced providers that support Copia are listed in **Appendix 3**

The staff providing the functions within these businesses are listed in the table in **Appendix 4**. Critical communications and data flows within these businesses are documented in Appendices 7 to 9.

The Copia Group operates from three Australian locations:

(Location 1) Head office: Level 47, 80 Collins Street, Melbourne, Victoria, 3000

(Location 2) Sydney: Level 25, 1 Farrer Place, Sydney, NSW, 2000

(Location 3) Brisbane: Suite 24, Level 18, 324 Queen Street, Brisbane, QLD

5.3 Critical Business Activities (CBA)

Based on the business mapping addressed above, the following critical dependencies have been identified:

Entities/Copia Funds/Products	Provider/System	Function	CBA
Copia Tenants	Property Owners	Meeting room access	Access to buildings
Copia	Commonwealth Bank (CommBiz)	Banking	Ability to transact
Copia	ADP	Payroll	Employee payments
OC Funds Chester Fund	Artega (Citi Group/Boardroom)	Fund administration	- Administration (applications and redemptions) - Holds scheme property

Entities/Copia Funds/Products	Provider/System	Function	CBA
ECP Fund Artisan Partners Fund TT Fund HSBC Fund		(custody/unit registry)	- Unit Registry - Unit pricing - Fund accounting - Taxation reporting
Chester	Dimension	Portfolio administration	- Portfolio records - Post trade compliance
OC Funds Chester Fund	IRESS	Market information services	- Securities pricing information - Trade confirmations
Chester Fund	Bloomberg	Market information services	Pricing information
OC Funds Chester Fund	Brokers	Trading services	Placing market orders
OC Funds	Analytics DB and routines	Internal system	Portfolio performance management and planning
OC Funds	Investment Information - MS Access Database	Internal system	- Portfolio pricing - Trade allocations - Test pricing and portfolio compliance - Model portfolios
OC Funds Chester Fund	Portfolio Trading and Holding records (MS-Excel)	Internal Systems	Investment team system for portfolio monitoring and trade modelling
OC Funds Chester Fund	Mail Server Microsoft Office 365	External Systems	Email portfolio and trading alerts (from MS Access Database and Artega)

5.4 Recovery Point Objectives

Based on the CBAs above, the following Recovery Point Objectives (**RPO**) have been defined.

System/Service	Critical Business Information	RPO	Service Provider Controlled
ADP	Payroll	1 business day	Yes
Artega	Unit Pricing	1 business day	Yes
Artega	Applications processing	1 business day	Yes
Artega	Fund accounting	1 month	Yes
Artega	Tax accounting	1 month	Yes
Commbiz	Bank account records	2 hours	Yes
Dimension	Portfolio management (Chester)	2 hours	Yes
IRESS	Market information	1 hour	Yes
IRESS	Trade confirmation advice	1 day	Yes
IRESS	Investment Information System	2 hours	Yes
Bloomberg	Stock information	1 day	Yes
Internal systems	Analytics DB and routines (OC Funds)	1 day	No
Internal systems	Investment Information System (OC Funds)	2 hours	No
Internal systems	Portfolio Trading and Holding records (OC Funds)	2 hours	No

System/Service	Critical Business Information	RPO	Service Provider Controlled
Office365/Sharepoint	Business files, email and business applications	2 hours	Yes

5.5 Business Continuity measures – outsourced services

The Copia Group's main services is Artega Investment Administration Pty Ltd (**Artega**). Under the terms of the Administration and Custody Services Agreement (**ACS Agreement**), Artega has assumed responsibility for the safe keeping of the funds' assets and unit registry. Artega has delegated custody to Citi Group for funds holding market assets (OC Funds and Chester) and unit registry to Boardroom Pty Ltd. Artega acts as custodian for units through feeder funds (Artisan and TT Funds). The ACS Agreement requires Artega to maintain business continuity arrangements, which includes providing a test and exercise schedule each year. These arrangements extend to custody and unit registry.

6. Sight emergency procedures

If any of the office sites, being the Melbourne [Loc 1], Sydney [Loc 2] or Brisbane [Loc 3], is impacted by a disaster which makes them unavailable for use, or a pandemic occurs and working from home orders are mandated, the CMT will determine if staff can work remotely from their homes. If the CMT determines that an event prohibits staff returning to the office, the procedures in 6.2 below shall be followed.

6.1 Evacuation Procedures

Melbourne staff are required to be familiar with the evacuation procedures communicated by the building manager, Dexus Property Services. Tenants are required to be evacuated. Both Melbourne Staff and the tenants are required to be familiar with the emergency procedures implemented by the building manager, Dexus Property Services.

In the case of Sydney and Brisbane staff, they are required to be familiar with the emergency procedures implemented by the building manager, Dexus Property Services and Abacus Group.

6.2 Overall Continuity Procedures (also refer to Appendix 5 for Pandemic Plan)

- a) The first action is to ensure that the situation is communicated to key stakeholders, to advise procedures to:
 - Employees of Copia
 - Tenants
 - Directors
 - Major service providers (where appropriate)
 - Investors – where appropriate and in particular situations.
 - Other relevant stakeholders
- b) If required, the CMT shall determine the need for staff to work remotely from their homes (noting that Copia supports WFH).
- c) Arrange for the temporary diversion of the main phone lines, the public inquiry numbers and mobile phones as appropriate.
- d) Arrange other communication where necessary.
- e) Assess the loss and extent of damage; notify insurer.

- f) Notify all staff of work commitments or otherwise, the expected days of interruption, procedures to follow and other arrangements that may be required.
- g) Ensure staff are adequately equipped at their homes to carry out their duties effectively (e.g., VPN access, computers etc.)
- h) Continue all postal communications through Australia Post and arrange to redirect the mail temporarily in arrangement with Australia Post.
- i) Arrange for the replacement of damaged equipment.
- j) Notify all staff and Tenants for return-to-office procedures.
- k) Effect any relevant insurance claims.
- l) Keep relevant stakeholders updated on the progress of the event (e.g., disaster/pandemic) and when staff and/or Tenants may return to the office locations

7. Succession Planning

The Copia Group recognises key person loss as a material risk exposure. Each staff member is required to manage the possible loss through skill and information sharing as part of their risk management procedures. Where possible, Copia encourages multiskilling amongst staff to reduce the risk of skills or knowledge loss caused when experienced employees leave.

A list of key persons and their alternatives is provided in Appendix 4.

8. IT Infrastructure disaster recovery

The server and internal business systems used by the Copia Group are backed up daily, and copies of these backups are stored offsite. In addition, the network-attached storage (**NAS**) uses a multi disc array (**RAID**) to address disc failure.

The IT Consultant maintains offsite all relevant documentation of the IT infrastructure such as network diagrams and documents showing IP addresses and passwords of servers, routers and other network assets.

If the File Server is to be replaced due to an outage or disaster at the business site, the IT Consultant will:

- a) Obtain all available backup drives stored onsite and offsite.
- b) Procure a new File Server that is similar to one that was previously used at Copia with equal or greater memory and hard disk capacity.
- c) Restore the Domain Coordinator / File server from offsite backup NAS or local backups.
- d) Connect one or more client computers to the new network.
- e) Verify the integrity of restored data, check shared files and availability.

9. BCP/DRP testing

Since WFH procedures were introduced with COVID, Copia has demonstrated that it can effectively operate without access to its office sites. Staff (and Tenants) continue to WFH and attend the offices when and if required.

A critical dependency for Copia in WFH is access to information held on the NAS volumes. These volumes are mirrored between the Melbourne and Sydney sites so if, for example, staff and the IT Consultant could not access the Melbourne site and NAS, it would be possible for all to remotely access the mirrored Sydney volumes.

The IT Consultant will conduct a recovery test at least half yearly. The recovery test will entail a recovery of the NAS volumes and last saved backup information onto a separate NAS.

10. BCP/DRP review, approval and training

Review

The BCP/DRP is reviewed biannually or earlier if required due to changes in business operations

The DRP is reviewed in consultation with the IT Consultant.

Approval

The BCP/DRP is approved by the Board or its delegate.

Training

Staff will receive appropriate training on this plan as required. The Copia Executive Team and relevant staff have access to the BCP/DRP.

A copy is stored on the CRS-Certus Policies & Procedures library and can be accessed electronically.
